Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to an apparatus, classified in class 606, subclass 60.
- II. Claims 8-15, drawn to a method of use, classified in class 606, subclass 69.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus may be used to perform a materially different process, such as tagging animals.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Art Unit: 3731

<u>SPECIES</u>	<u>FIGURE</u>
----------------	---------------

1	1A
2	1B
3	1C
4	1D

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 3731

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Peter Dilworth on September 2, 2003 a provisional election was made with traverse to prosecute the invention of Group I, Species 1, claims 1, 2, 6 and 7. Affirmation of this election must be made by applicant in replying to this Office action. Claims 3-5 and 8-15 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3731

Claims 1, 2, 6 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Pat. No. 6,294,187 to Boyce et al. Boyce discloses in Fig. 3 a rectangular body 90 in the form of a plate. The device further comprises a screw and a single through bore. "Single" is interpreted as an open-ended limitation. The claim states, "*comprising...a single through bore.*" There may exist multiple single through bores. Therefore, the limitation is legally interpreted such that more than one through bore may exist within the body. The body may be partially demineralized bone. See col. 2, lines 45-59.

In the alternative, the body 90 of the implant may not necessarily comprise the entirety of element 90. The body may be a rectangular portion of the device that only comprises a single through bore.

Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 1,025,008 to Miner. Miner discloses in Fig. 1, a body/plate 1 and a screw 7.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: U.S Pat. No. 5,505,731 to Tornier, U.S. Pat. No. 6,136,002 to Shih et al., U.S. Pat. No. 6,277,149 to Boyle et al., and U.S. Pub.No. 2002/0045897 to Dixon et al.
